Non-technical Project Seminar

What is it about?

The art of publishing is an important capability for every student. For a successful completion of a research project or master thesis, the provided scientific work must be presented convincingly and professionally. But what is expected? What standards and rules must be adhered to? How do a good presentation and final paper should look like anyway?

These and similar questions are answered at the **Non-technical Project Seminar**.

What can I expect?

- A lecture series of 4 sessions:
    1. scientific writing
    2. professional presenting
    3. visualization
    4. literature survey and reference management
- Write a short paper about a given topic.
- Give a short presentation about the same topic.
- A written certificate of attendance.

How do I participate?

The module is compulsory for all Master students of *Electrical Engineering and Information Technology*. Besides, all Master students of *Systems Engineering and Engineering Cybernetics* or *Chemical and Energy Engineering* are also voluntarily invited. So sign up at `https://elearning.ovgu.de/course/view.php?id=808`!

The enrollment key is: `ntps2019`
